

SUP BUYER'S GUIDE

At Affordable SUPs, we are passionate about Stand Up Paddleboarding and about providing our friends and neighbors with superior quality Stand Up Paddleboards, Paddles, and Paddleboard Accessories at the absolute BEST VALUE on the market...that's why we have chosen to feature VESL Brand Stand Up Paddleboards in our shop.

VESL brand SUPS are arguably the best option for the perfect combination of quality and price available on the market today. Made with only high-tech materials and cutting-edge construction techniques, these remarkable Stand Up Paddleboards are built with strength and durability, utilizing clean, simple lines and modern aesthetics, and conceived with quality and performance in mind.

Designed by Paddlers who spend their time on the water, surfing and paddling in all types of conditions, VESL Paddleboards feature expert workmanship, beautiful colors and styling, and intuitive shapes and designs. In short, they are the most comfortable and durable boards you can buy, perform well under all conditions, and are very reasonably priced.

Made with the most advanced designs and technologies available, anywhere, each VESL Paddleboard is shaped with unique proprietary **COMPRESSION MOLDING** techniques that fuse 20Kg EPS foam into the strongest Paddleboard cores possible.

These cores are then pre-sealed and vacuum-bagged to make them watertight, and wrapped with layers of fiberglass and natural materials like Australian Pine, genuine **BAMBOO** and beautiful full-grain Teak.

Before the final layer of fiberglass goes on, a unidirectional **CARBON FIBER** patch is added to the standing area for added strength, and the rails, nose and tail are all wrapped with **KEVLAR**, a reinforcing agent often described as being "five times stronger than steel on an equal weight basis", and with a tensile strength so high that it's actually used to make bulletproof vests!

Not only do these space-aged materials and superior construction techniques make each and every VESL brand Stand Up Paddleboard 25-30% stronger than before, but weighing in at only about 23 pounds, they're also the lightest boards on the market.

Every VESL Stand Up Paddleboard includes:

- Beautiful colors, retro-surf styling and designs
- Comfortable, water repellent EVA deck pads
- Integrated ergonomically-designed "butterfly" carry handles
- Universal Classic Stand Up Paddle/Surf fin sets
- Automatic SUP venting systems

Don't settle for anything less! VESL Paddleboards will take your SUP experience to the next level, and **Affordable SUPs of Southern California** will give you the best price and customer service you could hope for. Call us for an appointment today! **949-322-8823**
